ACADEMIC PROJECTS

Crypto Vault Web | Tech: Laravel, MySQL

Mar 2026

A web-based version of Crypto Vault that simplifies file encryption and decryption using AES and DES through a simple web interface.

DocuGrad | Tech: Laravel, PHP, MySQL

Feb 2026

A full-stack web application designed to manage academic and document workflows with a modern frontend toolchain.

Custom Design Builder for evermore | Tech: React, PHP, MySQL

Jan 2026

A full-stack e-commerce application featuring custom design-building. Users can add designs, add text, and finally make customized products of their choice.

Evermore | Tech: Figma

Nov 2025

Designed a Figma prototype for the Evermore eCommerce website, visualizing a complete online shopping system from product browsing to checkout.

IOT Farming System | Tech: Figma

May 2025

Developed a poster and frontend UI prototype in Figma for an IoT-based Farming System to demonstrate smart agriculture solutions and technology integration.

Hash Generator | Tech: Java, Java Swing, SHA-512

May 2025

It converts user input into secure SHA-512 hash values. Demonstrates one-way encryption concepts and is useful for safely storing or verifying sensitive text like passwords.

Crypto Vault | Tech: Java, Java Swing, AES, SHA-512

Apr 2025

A secure desktop application that allows users to register/login, then encrypt and decrypt files using a 16-character AES key. Protects user authentication with SHA-512 password hashing and organizes encrypted/decrypted files in separate folders.

Fun With Set Mania | Tech: Java

Nov 2024

A learning project that helps users practice core set theory concepts, solve quizzes, understand reflexive, symmetric and transitive relations and solve matrix equations through interactive programs and quiz-style components.
